PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of professional experience building and deploying AI-integrated internal systems. Specialized in local LLM integration, document intelligence pipelines, and full production ownership in air-gapped server environments. Experienced across the full stack — Next.js and React on the frontend, FastAPI and Node.js on the backend — with hands-on expertise in asynchronous processing, RBAC design, and Docker-based deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: Next.js, React.js, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs

Databases & Caching: PostgreSQL, MongoDB, Redis

Search & AI: Meilisearch, Tesseract OCR, LLM Integration

Async & Processing: Celery, Background Jobs, Task Queues

Infrastructure: Docker, Linux, Nginx, CI/CD

EXPERIENCE

Full Stack Developer

Dec 2025 – Present

Malayamanorama, Kerala

- Architecting and developing internal full-stack applications using Next.js and FastAPI, owning end-to-end delivery from system design to production deployment.
- Integrated local LLM models into internal tooling to enable AI-assisted workflows without external API dependency.
- Deployed and maintained applications on an air-gapped server infrastructure, managing networking, containerization, and environment configuration.
- Handling full production ownership including Docker-based deployment, Nginx configuration, and system reliability in a constrained environment.

Full Stack Developer

May 2025 – Nov 2025

IhubRobotics, Kerala

- Engineered an AI-assisted patient interaction system using Next.js and FastAPI, supporting automated intake workflows.
- Implemented chatbot-based data capture and summarization, reducing manual patient intake effort by 40%.
- Structured backend workflows to route cases to appropriate specialists based on extracted context.
- Integrated LLM-based processing for summarization and decision support.
- Improved response handling and system efficiency for real-time chatbot interactions.

Front-End Developer
SMBS Infolab LLC, Kerala

Dec 2024 – Apr 2025

- Created a high-performance certificate management application using React, Vite, and Tailwind CSS.
- Developed a browser-based certificate editor using React Konva.js.
- Led frontend implementation for an e-commerce product builder platform.
- Enhanced UI responsiveness and improved application performance.

Junior Front-End Developer
Bringmebis, Kerala

Oct 2020 – Sep 2022

- Built reusable UI components using React and modern frontend practices.
- Produced wireframes and UI prototypes using Figma.
- Delivered SEO-optimized web applications and improved usability for client-facing systems.

PROJECTS

AI-Powered Document Intelligence Platform

- Designed and delivered a production-grade document intelligence system from scratch, handling end-to-end architecture and implementation.
- Architected a scalable backend using FastAPI, Redis, and Celery to support concurrent processing and eliminate CPU blocking.
- Implemented role-based access control (RBAC) for secure document visibility across multiple user roles and divisions.
- Integrated OCR-based document extraction using Tesseract and high-performance search using Meilisearch.
- Enabled AI-assisted document retrieval and summarization using local LLM integration.
- Deployed and maintained the system in an air-gapped environment with Docker-based infrastructure.

E-Commerce Customization Platform

- Engineered a dynamic product configuration system enabling real-time customization workflows.
- Integrated payment processing and optimized transaction handling.
- Improved application performance and reduced rendering latency for interactive UI components.

EDUCATION

Master of Computer Application
APJ Abdul Kalam Technological University

2022 – 2024

Bachelor of Science in Electronics
MG University

2017 – 2020
