PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of professional experience building and deploying AI-integrated internal systems, following a self-driven transition from an Electronics background into software engineering. Specialized in local LLM integration, document intelligence pipelines, and full production ownership in air-gapped server environments. Experienced across the full stack — Next.js and React on the frontend, FastAPI, Node.js, and Django on the backend — with hands-on expertise in asynchronous processing, RBAC design, and Docker-based deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: Next.js, React.js, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, Django, REST APIs

Databases & Caching: PostgreSQL, MongoDB, Redis

Search & AI: Meilisearch, Tesseract OCR, LLM Integration

Async & Processing: Celery, Background Jobs, Task Queues

Infrastructure: Docker, Linux, Nginx, CI/CD

EXPERIENCE

Full Stack Developer

Dec 2025 – Present

Malayala Manorama, Kerala

- Own end-to-end architecture and delivery of internal full-stack systems (Next.js, FastAPI, Node.js, Django) spanning AI document intelligence, internal file infrastructure, and event management platforms — detailed under Projects.
- Manage full production ownership on air-gapped infrastructure, including Docker-based deployment, Nginx configuration, and system reliability under constrained resources.

Full Stack Developer

May 2025 – Nov 2025

IhubRobotics, Kerala

- Engineered an AI-assisted patient intake system (Next.js + FastAPI) with chatbot-based data capture and LLM-based summarization, reducing manual intake effort by 40%.
- Structured backend workflows to route cases to appropriate specialists based on extracted context.
- Improved real-time chatbot response handling and system efficiency.

Front-End Developer

Dec 2024 – Apr 2025

SMBS Infolab LLC, Kerala

- Built a high-performance certificate management application (React, Vite, Tailwind CSS) including a browser-based certificate editor using React Konva.js.
- Led frontend implementation for an e-commerce product builder platform, improving UI responsiveness and performance.

Junior Front-End Developer

Oct 2020 – Sep 2022

Bringmebis, Kerala

- Built reusable UI components and delivered SEO-optimized, client-facing web applications using React.
- Produced wireframes and UI prototypes in Figma.

PROJECTS

AI-Powered Document Intelligence Platform (Malayala Manorama)

- Designed and delivered a production-grade document intelligence system from scratch, now serving 500+ active users.
- Architected a scalable FastAPI backend with Redis and Celery, integrating OCR-based extraction (Tesseract) and high-performance search (Meilisearch).
- Built a dossier system with role-based access control (RBAC), letting users group documents into access-controlled dossiers shared across teams and divisions.
- Enabled AI-assisted document summarization and retrieval via local LLM integration, deployed entirely in an air-gapped, Docker-based environment with no external API dependency.

Internal File Transfer System (Malayala Manorama)

- Built a Django-based internal file-sharing application with a chunked upload pipeline for efficient large-file handling, per-user access management, and shareable download links distributed via email.
- Deliberately kept the stack lean — using scheduled cron jobs instead of Redis/Celery for file purging — after evaluating that the added complexity wasn't justified by the system's actual load.

Event Management System (Malayala Manorama)

- Built a Node.js/Express backend with a React + Vite frontend to manage internal company events end-to-end.
- Handled multi-domain workflows: bulk document uploads, attendee transport logistics, accommodation management, and bulk email dispatch via BullMQ-based job queues.

EDUCATION

Master of Computer Application

Oct 2022 – 2024

APJ Abdul Kalam Technological University

Bachelor of Science in Electronics

2017 – 2020

MG University

LANGUAGES

Malayalam: Native

English: Professional

Hindi: Professional
